Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 20 – 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yeo (US 5,503,076).

Regarding claims 20 – 22 and 28 – 32: Yeo discloses a multi-color printed nonwoven web laminate 10 or any other type of substrate layer (column 4, lines 8-11, column 5, lines 29-34) for use in an outer cover of absorbent personal care products such as diapers and incontinence garments (column 1, lines 12-14 and column 7, lines 52-57) comprising a fibrous, absorbent facing layer/overlay 12 and substrate layer/additional other component 14, and an image including at least one ink having the color of red, blue, and green 16a, 16b, 16c and inherently black [Note that the primary colors red, blue, green when mixed form black] (column 4, lines 8-16 and figure 1), the image being printed in a non-contact manner via flexographic or ink-jet printing for good print pattern definition (column 8, lines 49-52), the laminate in one embodiment being printed at a line speed of approximately 100 feet per minute (column 10, lines 39-42). Yeo further discloses the image being printed in a non-contact manner via flexographic or ink-jet printing for good print pattern definition as discussed above with respect to claim 1, the image inherently being printed with the highest threshold of blank ink in

Art Unit: 3761

order to maximize the image quality. Yeo further discloses a focal element 16b for example (figure 1).

Yeo does *not expressly disclose* the dimensions of the design elements. The design elements are result effective variables since they are a result of the number of designs placed on the substrate. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Yeo with design elements dimensions, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch and Slaney*, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980).

Regarding claims 23-26 see the discussion above with respect to claim 20. Yeo further discloses the facing layer/outer cover 12 comprises a white background (which inherently is formed via the loading of fibers with titanium dioxide which produces a white color) on which an image such as stars and hearts is printed (column 5, lines 12-16 and figures 1 and 3).

Regarding claim 27: Yeo discloses water-based inks that may include wax additives as set forth in col. 6, lines 53 – 60 and col. 7, lines 39 – 44.

Response to Arguments

Applicant's arguments with respect to claims 20 – 32 filed June 29, 2007 have been fully considered but they are not persuasive.

Art Unit: 3761

The examiner maintains the rejection of claims 20 – 32 because, as stated in the rejection, the design elements are considered result effective variables since the size of each is dependent upon the number of designs placed on the substrate. In light of such, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the dimensions of the design elements since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art.

Allowable Subject Matter

Claims 1 – 18 and 33 – 36 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The applicant's arguments filed June 29, 2007 are persuasive with respect to the resolution and the line speed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3761

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
